Quickpac: flexible, low-emission parcel deliveries in Switzerland

Quickpac ensures that your parcels reach their destination quickly and without harming the environment. Quickpac is the first parcel service in Europe to deliver its parcels solely using electric cars, and has one of the largest electric car fleets in Switzerland with over 300 vehicles. Quickpac's other key strengths include evening and Same Day and seamless shipment tracking.

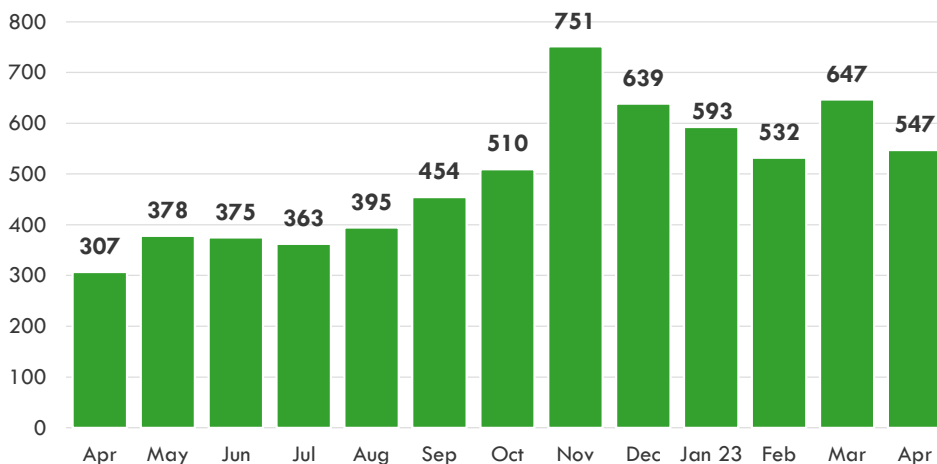

Benefits for senders of parcels

- Four different shipment speeds (from Economy to SameDay)
- Evening delivery at an affordable price
- Delivery on the day of handing in (Same Day Delivery)
- Continuously updated forecasts and information about the delivery time

Benefits for recipients of parcels

- Low-emission parcel deliveries
- Evening delivery for no extra charge
- Same Day Delivery: order in the morning, delivered in the evening
- Modern shipment tracking with SMS or email notifications
- Option to collect your parcel from the nearest PickMup location

Parcels delivered by Quickpac during the past year, in thousands

Quickpac was founded in 2019 by Quickmail AG, Switzerland's only private mail carrier. Its customers include mail-order companies and online shops in Switzerland and neighbouring countries.

Quickpac currently has 333 full-time employees and 89 part-time employees. This represents a full-time equivalent of 333 people.

Quickpac operates depots in Winterthur, Högendorf, Dietikon, St. Gallen, Ostermundigen and Ebikon and can reach more than 2.1 million Swiss households twice a day, 53.5 % of the country's total population (as of May 2023).

An innovative sorting system (patent pending) and quick links between sorting depots mean that Quickpac already has the capacity to deliver up to 25,000 parcels per day. With the intelligent, self-developed, dynamic route planning, efficient and thus economical delivery tours are run.
